

Why We Are Faster And Better

Features of our typical 14-page wire marker book

Better Page Layout

- Every page is in A, B, C format, allowing the Electrician to quickly and **easily** determine proper phase color. This helps prevent mislabeling.
- 15 label strips of each number on the same page.
- 5 more labels of each type than the competitors 10-page books.
- No more flipping pages to find the next label of each type.
- **Easily** remove labels with right or left hand.
- Commonly used full boats on each page, for **easy** homerun and feeder labeling

Rebinding Holes

- **Easily** combine unused pages from multiple books

Easily tear out used pages

Easy Quick Reference Phase Chart

- Use when ordering, selecting, and labeling wire
- Quickly choose the correct wire or mc color for a circuit

Better Use of Available Space

- Front inside Cover
- Features scales and space for writing notes.
- Back inside cover
- Older designs offer additional space for notes.
- Newer designs offer circuit directory.
- Back Cover
- Order form and contact information.

42 Numbers

- Like most panels, our books stop at 42 circuits, whereas the competitors books go to 45. We deleted 43, 44 and 45 to give you more useable numbers.

Easy Part Numbers
