

Faster and Better Wire Marker Information Sheet

SWH-43-84

Front Cover

Quick reference chart

- Odd #'s on the Left
- Even #'s on the right
- Just like in an Electrical Panel.
- No more time spent creating similar charts in the field.
- No more Math.

Product Identifier

- This is our Universal, white colored wire marker book

A-phase
B-phase
C-phase

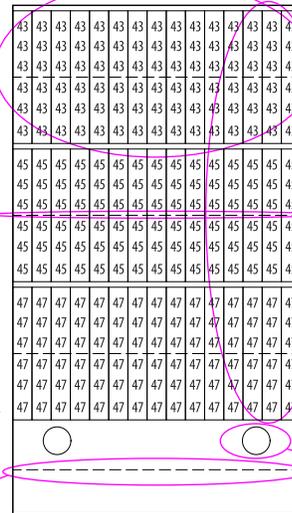

- Perforation to easily adjust size of strip for smaller wire.

- Our books only go to #84 as opposed to our competitors books which go up to #90

- Easy to remember part #'s

- Easily tear out used or unused pages

First Page

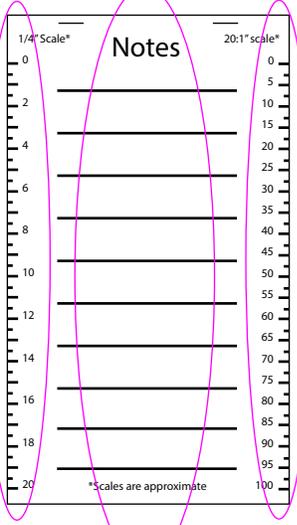

- 15 numbers each line
- All like #'s on same page
- No more flipping pages to find the next #1
- Easily know when you are out of a particular #

- This group is typically pulled together as a homerun, we put them on the same page to make labeling faster
- First row is A-phase
- Second row is B-phase
- Third row is C-phase

- Hole for easy binding of removed pages

Front Inside Cover

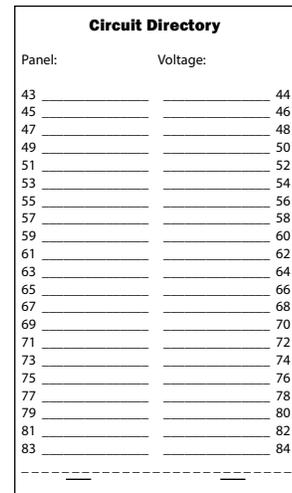

- Handy 1/4" scale

- Handy 20:1 scale

- Space for notes

Back Inside Cover

- Circuit Directory to keep track of branch circuit designations, can be used for additional notes, or can be removed and used as a temporary panel schedule
